

SHORTCOURSE in Biodynamic WINEGROWING

Biodynamic® farming is entering the mainstream of viticulture, with more than 70 wineries and vineyards now certified or on the way. At this one-day conference, lunch and tasting, you will learn why so many growers have chosen the Biodynamic

approach to soil health and pest management. You'll also get a practical, hype-free introduction to Biodynamic principles and practices for farming and winemaking, from experienced vintners who have put them to the test.

HOSTED BY DEMETER USA UC
@ University of California Cooperative Extension CE

SPEAKER PRESENTATIONS

Biodynamic Farming Enters the Mainstream
